The problem is - as you say - you do not own Omegaverse.

She's lost her Apple account, though her other titles are still on B&N and Kobo. I don't know what mechanism we can use to shut her down completely as an author, unless YOU want to try to trademark Omegaverse. (Which we might be able to get...)

I think our best strategy right now is to push Amazon HARD. If she loses her account completely it will in effect shut her down.

If you have a different / better plan or strategy please share it.
